

MP1 Benchmark Assessment REVIEW

1) Graph the following. Label at least 5 points on the graph. State domain and range in interval notation.

a) $f(x) = -2(x - 1)^2 + 8$

b) $f(x) = -2|x - 1| + 8$

a = -2 h = 1 k = 8

a = -2 h = 1 k = 8

- 2) The New River Gorge Bridge in West Virginia is the world's largest steel single arch bridge. The arch can be modeled by the function $y = -0.000498x^2 + 0.847x$, where x is the horizontal distance in feet and y is the height in feet. Round all parts to the TENTHS place if necessary.

$$x = -\frac{b}{2a}$$

- a) What is the bridge's maximum height?

$$x = \frac{-b}{2a} = \frac{-0.847}{2(-0.000498)} = 850.4$$

$$y = -0.000498(850.4) + 0.847(850.4)$$

$$y = 360.1 \text{ ft}$$

max height
360.1 ft

- b) How long (total distance) is the bridge?

$$850.4 \times 2 = 1700.8$$

total distance 1700.8 ft

- 3) Solve $3x^2 - 6x = -14$ using the quadratic formula. Write your answer in simplest form.

$$3x^2 - 6x = -14$$

$$\begin{array}{r} +14 \quad +14 \\ \hline 3x^2 - 6x + 14 = 0 \end{array}$$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

$$a = 3$$

$$b = -6$$

$$c = 14$$

$$x = \frac{6 \pm \sqrt{(-6)^2 - 4(3)(14)}}{2(3)}$$

$$x = \frac{6 \pm \sqrt{-132}}{6}$$

$$x = \frac{6 \pm \sqrt{-1} \sqrt{4} \sqrt{33}}{6}$$

$$x = \frac{6 \pm 2i\sqrt{33}}{6}$$

$$x = \frac{3 \pm i\sqrt{33}}{3}$$

4) Simplify each. Write answers in standard form: $a+bi$

a) $(\underline{-3} + \underline{6i}) + (\underline{9} - \underline{11i})$

$$\boxed{6 - 5i}$$

b) $(-4 + 3i) - (-8 - 21i)$

$$\underline{-4} + 3i + \underline{8} + 21i$$

$$\boxed{4 + 24i}$$

c) $\frac{(4-6i)(-2+4i)}{(-2-4i)(-2+4i)} = \frac{-8 + 16i + 12i - 24i^2}{4 - 8i + 8i - 16i^2}$

$$= \frac{-8 + 28i - 24(-1)}{4 - 16(-1)}$$

$$= \frac{-8 + 28i + 24}{4 + 16}$$

$$= \frac{16 + 28i}{20}$$

$$= \boxed{\frac{4 + 7i}{5}}$$
